01 Specifications

Size	L575*W245*H80MM
LED	SMD 5050 60pcs
Install Height	8-10m
Input Voltage	AC 85-305V
Material	Aluminum + PC
Warranty	3 years

02 Overview

ML7-2 modular LED street light is the AC-powered workhorse of our roadway lineup. The modular LED engine (SMD 5050 60pcs) runs on AC 85-305V input, with surge protection up to 6kV, PF≥0.95, and IP65 housing.

Each module is independently replaceable — if one module fails in the field, you swap a single module instead of

the whole fixture, cutting service costs by 60-70%. Tool-free latch design means a single technician with a 4mm hex key can complete a module swap in under 5 minutes.

Typical applications: city streets, municipal roads, parking lots, industrial parks, port terminals, and airports. Available in 8-10m pole heights with optional photocell, dimming, and smart-city control nodes. CE, RoHS, ISO 9001 certified.
